## Online Courses

If you have an interest in a course that is not offered by our school, see your counselor about the availability of the course through online format. Administration reserves the right to deny requests.

**Grade 9****Required**

**English:**  
English 9: Global Communications

**Math:**  
Algebra or \* Geometry

**Science:**  
Science 9 or \* Biology

**Social Science:**  
U.S. History I

**Physical Education/Health:**  
\* Health  
\* Introduction to Health and Fitness  
(Required either 9th or 10th grade)

**Electives**

**Art:**  
Intro to Art  
Graphic Arts/Design 1 (TC)  
\* 3D Printing and Modeling  
\* Robotics

**Business/Information**

**Technology:**  
Focus on Business  
Accounting I  
Marketing  
Law and You  
\* Video Game Creation

**Family & Consumer Sciences:**

\* Culinary Arts I, II  
\* Development of the Young Child

**Music:**  
Band  
Treble Choir  
Concert Choir  
\* Guitar I, II  
\* \* Hand Drumming  
\* \* Advanced Musicianship  
\* Class Piano I, II, III

**Science:**  
Marine Ecology (Summer)

**Social Science:**  
\* World Geography

**Technology Education:**

\* Home Maintenance  
Woods I  
Metals I (TC)  
\* Small Engine Technology

**World Languages:**

Spanish I, II

**Grade 10****Required**

**English:**  
English 10: American Studies

**Math:**  
Geometry or \* Algebra II

**Please Note: A second credit of Math is required in the 10<sup>th</sup> grade year.**

**Science:**  
Biology or \* General Chemistry

**Please Note: A second credit of Science is required in the 10<sup>th</sup> grade year.**

**Social Science :**  
U.S. History II or European History

**Physical Education:**  
\* Introduction to Health and Fitness  
(Required either 9th or 10th grade)

**Electives**

**Art:**  
Independent Art  
\* Photography I  
Graphic Arts/Design II

**Business/Information**

**Technology:**  
Accounting II

**English:**  
\* \* Creative Writing

**Family & Consumer Sciences:**

\* Culinary Arts III  
\* Early Childhood Education

**Health Science:**  
\* Intro. to Health Care Occupations

**Music:**  
\* Show Choir

**Physical Education:**  
\* Competitive Team Sports  
\* Team Sports  
\* Recreational Sports  
\* Personal Fitness  
Year Advanced Weight Training  
\* Sem. Advanced Weight Training  
\* Lifeguarding

**Technology Education:**  
Construction (Residential)  
\* Woods II  
\* Metals II (TC)  
\* Automobile Technology I (Car Care)  
Formula Racing (AS)  
\* Raider Manufacturing

**World Languages:**  
Spanish II, III

**Grade 11****Required**

**English:** 1 Credit (1-2 courses) from the following:  
\* College Prep English  
\* Mythology  
\* Mystery & Horror  
\* Fantasy & Science Fiction  
\* Sports Literature  
\* Modern Novel  
\* War & Conspiracy  
\* Outdoor Literature  
\* Creative Writing (in addition to 2 req.)

**Math:**  
Algebra II  
\* College Readiness Math  
\* Math Analysis  
Tech Math  
Pre-Calculus

**Please Note: A third credit of Math is required in the 11<sup>th</sup> grade year.**

**Science:** 1 Credit (1-2 courses) from the following:  
General Chemistry  
Advanced Biology (TC)  
\* Human Genetics  
\* Human Anatomy & Physiology (AS)  
\* Pathology  
Ecological Science  
Physics (TC)  
Advanced Chemistry

**Social Science :**  
\* American Government

**Physical Education:**  
\* Any of the Grade 10 elective offerings

**Electives**

**Art:**  
Studio Art

**Business/Information Technology:**  
Accounting III

**Family & Consumer Sciences:**  
Culinary Arts III  
Management (TC)

**Criminal Justice:**  
\* Intro to Criminal Justice

**Social Science:**  
\* Sociology (AS)  
\* Today's Topics  
Introduction to Psychology (TC)  
\* Developmental Psychology (TC)

**Technology Education:**  
\* Independent Study in Technology

**World Languages:**  
Spanish III, IIII

**Work Experience:**  
\* Tech Prep  
\* Youth Apprentice

**Post Secondary:**  
\* ECCP & \* SCN

**Grade 12****Required**

**English:**  
\* Speech (AS)  
1 Credit (1-2 courses) from the following:  
Any of the Grade 11 offerings  
\* Honors English (TC)

**Social Science :**  
\* Financial Literacy

**Electives**

**Math:**  
\* Calculus

**World Languages:**  
Spanish III, V

**Work Experience:**  
\* Tech Prep  
\* Youth Apprentice

**Post Secondary:**  
\* ECCP  
\* SCN

---

**Courses may be taken the year listed and any previous year, except where noted in the course description.**

---

**CODES:**  
\* Semester Course  
\* Needs Teacher Approval

# GRADUATION REQUIREMENTS

The minimum credit requirement will be as follows:

Minimum Credit Requirement- A high school diploma shall be granted upon successful completion of a total of at least twenty-four (24) credits in grades 9 through 12, including four (4) credits of English, three (3) credits of Mathematics, three (3) credits of Science, three and one-half (3.5) credits of social sciences, one and one-half (1.5) credits of physical education, one half (0.5) credit of health education and eight and one-half (8.5) elective credits.

## **Twenty community service hours are required for all students before graduation**

Language Arts	4 Credits
Mathematics	3 Credits
Science	3 Credits
Social Science	3.5 Credits
Physical Education	1.5 Credit
Health	0.5 Credits
Electives	8.5 Credits
<b>Total</b>	<b>24 Credits</b>

## **Community Service hours**

Twenty (20) community service hours are required for all students before graduation. Forms are available on the Two Rivers High School Web site under the Student's Services tab or in the High School office.

## **ACP**

All students are required to complete grade-level ACP requirements in order to graduate. Students will be provided with grade level checklists. Students from the class of 2021 will be the first class that is required to have the checklists completed for all four years.

## **Civics Exam**

Students must pass the Civics exam with 65% or better score.

# Planning Your High School Courses

Graduation is the first goal of every student enrolled in high school. Besides meeting the requirements for graduation, the student's choice of subjects should have direction and purpose. The student who chooses school subjects with a definite goal in mind will enjoy the time spent on them and will be better prepared for the future. Your high school program will depend upon your interests, abilities and future plans. Following are some suggestions, which may help you:

1. Make sure your program fulfills graduation requirements
2. Keep your vocational goals in mind
3. Study the entrance requirements for schools of higher education
4. Take subjects with value, meaning and appeal for you

## Course Load

Students must maintain their full-time status with a course load of 6 credits per year and a minimum of 6 classes per semester. Variation from this policy may only be granted through an IEP, 504 plan, or through administration approval.

## Course Changes

Students requesting a change *prior to the start of the school year* must meet with both their parent/guardian and a counselor. They may only enroll in classes with space available. Permission to drop a class may be denied if the number of students remaining in the class becomes too low to offer the course.

## Adding & Dropping Courses

Staffing, courses to be run, along with the number of sections of each course are determined by the number of students that sign up for each class. When students request course changes after the master schedule has been built, it often creates overloaded sections in the course that is added. It also leads to small-sized sections in the course that are dropped. This is one reason why course changes are only granted after careful consideration.

## **After classes begin, students will not be allowed to drop classes.**

Students may not add a course after the **fifth day** of the new semester. If the minimum course load requirement is met, a student may withdraw from a course after meeting with both their parent/guardian and a counselor. The student will receive an "F" for the semester grade, which counts against academic records and affects athletic and co-curricular eligibility. A teacher-initiated course withdrawal may be granted without penalty, if the student has completed all coursework and met with the teacher for extra help. Parents and students who wish to meet with a counselor should call ahead to schedule an appointment.

## POST SECONDARY ADMISSIONS REQUIREMENTS

Although admissions requirements at colleges and universities vary, the University of Wisconsin system **recommends** the following preparations for college bound students. This program would prepare students for almost all colleges and universities nationwide:

English	4 credits (including literature and composition)
Mathematics	3 credits (including Algebra, Geometry, and Algebra II)
Science	3 credits (including Science 9, Biology, <b>plus</b> an advanced lab science course)
Social Science	3 credits
Foreign Language	2 credits <b><i>in the same language</i></b>

Additional useful skills and experiences – typing, computer literacy, visual and performing arts, school and community activities.

These are ***recommendations only***. Not all colleges and universities **require** all of this course work. If you do not have all the above courses, you may be required to take remedial and/or additional courses once you are in college. See your counselor early in your high school career or check college admission and program requirements to be sure that your program of study meets the specific requirements at the college or university of your choice.

### Wisconsin Technical Colleges

Admission to specific programs is dependent upon individual ability to meet minimum requirements and prerequisites.

**Students are advised to carefully review their course selections to ensure that they can meet all admission requirements for the school training program of their choice. Colleges are increasingly scrutinizing the level of difficulty of the course work taken by students during their senior year. Students who elect to take less demanding course work may find admission to certain colleges and technical programs very difficult.**

## **Articulated Credits/Dual Credits**

There are two types of Articulated/Dual credits—**advanced standing** and **transcripted credit**. Students benefit from both types of articulation.

### **Advanced Standing (AS):**

High school students may take high school courses for which advanced standing credit is available upon enrollment at a postsecondary school. All Wisconsin technical colleges will recognize “advance standing agreements” made between a high school and a single Wisconsin technical college for the purpose of granting advanced standing for comparable courses when requested at another technical college.

### **Transcripted Credit (TC):**

Select high school courses may be taken for transcripted (dual) credit. The course is the same as what is offered at a postsecondary college and the students receive credit from both the high school and college. The Early College credit program also falls into this category.

### **CAPP - Cooperative Academic Partnership Program:**

CAPP courses are college courses. Students who meet the entrance requirements and successfully complete CAPP course requirements receive a transcript of the credits from the college offering the course. Check with individual college/university requirements for credit.

### **Early College Credit Program/Start College Now:**

High school students can take classes at a college that are not offered at the high school. The student must meet and get the approval of his or her counselor as well as complete all necessary paperwork by October 1, if requesting for second semester, and March 1, if requesting for first semester. High school credits are granted for post-secondary courses taken under the Early College Credit Program and Start College Now. The approved high school credit(s) granted are as follows: one-quarter of high school credit per one semester credit offered by a post-secondary course.

# ART

<i>Title of Course</i>	<i>Course #</i>	<i>Year(s) Offered</i>	<i>Credit</i>	<i>Prerequisite</i>
Intro to Art	01100	9-10-11-12	1 credit	\$17 material fee
Independent Art	01101	10-11-12	1 credit	Intro to Art \$17 material fee
Studio Art	01300	11-12	1 credit	Intro to Art Independent Art \$17 material fee
Photography I	01220	10-11-12	0.5 credit	Material fee
Graphic Arts/ Design I (TC)	01250	9-10-11-12	1 credit	Dual-credit
Graphic Arts/ Design II	01320	10-11-12	1 credit	A grade of "C" or better in Graphic Arts/Design I or teacher permission. Course is repeatable
3D Printing and Modeling	01330	9-10-11-12	0.5 credit	
Robotics	01390	9-10-11-12	0.5 credit	

**Intro to Art**      01100                      9-10-11-12                      1 credit                      Materials needed: Fee

This class is an introduction to the visual arts, students will individually explore and create with clay, paint, sculpture, printmaking, paper making, and calligraphy, while enhancing their drawing techniques in pen, ink, pastel and marker. Students must complete Intro to Art to proceed to other art classes.

**Independent Art**    01101                      10-11-12                      1 credit                      Prereq.:Intro to Art  
Materials needed: Fee

This class allows students the freedom of individual creative expression by allowing them to work independently to plan and create, using the choice of mediums they find most enjoyable.

**Studio Art**            01300                      11-12                      1 credit                      Prereq.: Intro to Art & Indep.  
Art. Materials needed: Fee

Students who have completed Intro to Art and Independent Art will be given the opportunity to use materials of higher quality to create and explore art as a possible career. Students will travel to area businesses and participate in a visiting artist series to help guide them in a possible career path as they discover their favorite mediums of choice.

**Photography I**      01220                      10-11-12                      0.5 credit                      Materials needed: Fee

Photography I is a semester long basic photography course open to all students in grades 10-12. Students will receive hands-on experience in using 35mm cameras, as well as digital cameras. Students will develop film and photographs using the darkroom as well as adjust and alter digital photographs using Adobe Photoshop. Materials are required for this course.

**Graphic Arts/  
Design I (TC)**              01250                      9-10-11-12                      1 credit                      Transcribed course

Graphic Arts/Design I is a basic course in the area of computer graphics which covers the primary graphic arts processes. Students will receive hands-on experience in the area of Graphic Arts/Design. Along with other equipment, students will use illustration software for precision layouts and project design, including illustration, photograph manipulation, screen printing, web design, and basic Flash animation. This is a general course for printing, business and art oriented students interested in learning about the second largest industry in the United States today. Students successfully completing this class earn 3 free Transcribed college credits from LTC. While these 3 free college credits are from LTC, they can be transferred to other colleges or universities.

**Graphic Arts/  
Design II**              01320                      10-11-12                      1 credit                      Prereq.: A "C" or better in Graphic Arts /Design 1 or permission from teacher

Graphic Arts/Design II is a continuation of Graphic Arts I. This class gives students an opportunity to expand their current knowledge of graphic design concepts. Students will get practical, hands-on experience advancing their knowledge of Action Script, and other design software, to create interactive multimedia designs.

**3D Printing &  
Modeling**              01330                      9-10-11-12                      0.5 credit

3D Printing and Modeling is a hands-on class that focuses on creating digital 3D objects. Students will learn how to create 3D shapes using a number of programs and explore many 3D printing options including different kinds of printers, types of plastic/metal, and printer settings to create quality 3D prints. This class also digs into the creative problem-solving process.

**Robotics**              01390                      9-10-11-12                      0.5 credit

This is a semester-long class that serves as an introduction to the world of robotics. This class focuses on using the design process to plan, build, problem solve, and program a working robot that is able to compete in the First Tech Challenge. The class will combine your skills in STEAM (Science, Technology, Engineering, Art, and Math) areas into a hands-on project.

# BUSINESS/INFORMATION TECHNOLOGY

<b>Title of Course</b>	<b>Course #</b>	<b>Year(s) Offered</b>	<b>Credit</b>	<b>Prerequisite</b>
Focus on Business	02100	9-10-11-12	1 credit	
Accounting I	02320	9-10-11-12	1 credit	
Accounting II	02325	10-11-12	1 credit	A grade of "C" or better in Accounting I
Accounting III	02327	11-12	1 credit	A grade of "C" or better in Accounting II
Marketing	02356	9-10-11-12	1 credit	
Law and You	02370	9-10-11-12	1 credit	
Video Game Creation	02375	9-10-11-12	0.5 credit	

**Focus on Business** 02100 9-10-11-12 1 credit

Focus on Business provides knowledge and skills that all young adults need to become experienced consumers, workers, and citizens. Topics covered in this class include: career planning, consumer buying strategies, using a checkbook, understanding credit cards, economic systems, business ownership, the relationship between government and business, saving and investing, insurance, and budgeting. Computers as a tool will be incorporated into this class.

**Accounting I** 02320 9-10-11-12 1 credit

This course is a blend of traditional methodology of accounting with current applications of computer technology. Students will be able to gain mastery of basic accounting concepts and procedures while they gain computer applications used to perform various accounting activities. This is an excellent course for students who plan on entering a career in business. Glencoe Accounting is a program that addresses the needs of students who want a strong foundation in basic accounting theory and procedures, integrated with computerized accounting systems.

**Accounting II** 02325 10-11-12 1 credit Prereq.: Accounting I with a "C" or better

Students enrolled in Accounting II will find this class designed to be used by the college accounting student as well as the vocational oriented student. This class covers much of the same materials that students will study in a beginning college accounting course, but at a level suitable for high school students. It also helps prepare those students for various tasks they will encounter on the job. *Computers as a tool will be incorporated into this class.* Students in advanced accounting will study basic and advanced accounting principles, use common techniques to interpret financial statements, describe differences in accounting for different types of business organizations, accounting for not-for-profit organizations, accounting for departments, branches and manufacturing and information required for the planning and control of business.

**Accounting III**    02327                    11-12                    1 credit                    Prereq.: Accounting II  
with a "C" or better

This course emphasizes advanced accounting theory and procedures, but also provides students with training in a computerized accounting system. This combination ensures a student a mastery in accounting concepts and procedures and a general understanding of how a computer can be used to perform various accounting activities. Accounting III will address the needs of a student who wants to enter a field in business in either the technical school or 4-year college setting.

**Marketing**                    02356                    9-10-11-12                    1 credit

Marketing activities are found in every type of business! In this course students will explore the foundations of marketing, specifically focusing on the marketing mix—place, price, product and promotion. The second semester of this course will focus on sports marketing, specifically sponsorship, event marketing and team marketing plans. Projects, hands-on activities and group work are prevalent.

**Law and You**                    02370                    9-10-11-12                    1 credit

Students who enjoy learning about trials, discussing the impact of current events on law and want to know more about their rights as an individual citizen. Students will participate in a variety of interactive and practical activities, such as in-class mock trials, case studies, interpreting contracts, Internet activities, field trips and guest speakers as part of the process of learning how law, specifically business law, impacts society. Mock trials will be conducted in the course.

**Video Game  
Creation**                    02375                    9-10-11-12                    0.5 credit

The student will learn several programming languages to create new video games that include animation, sound, music, motion, lives and levels. Technical skills related to software development, computer programming and graphic design will be taught. Creativity, innovation and critical thinking skills will be used to create video games in this STEM (science, technology, engineering and math) related course!

# FAMILY AND CONSUMER SCIENCE

<i>Title of Course</i>	<i>Course #</i>	<i>Year(s) Offered</i>	<i>Credit</i>	<i>Prerequisite/Fees</i>
Culinary Arts I	04220	9-10-11-12	0.5	Class fees required. This is a prerequisite for Culinary Arts II, III.
Culinary Arts II	04240	9-10-11-12	0.5	Culinary Arts I. Class Fees
Culinary Arts III	04260	10-11-12	1	Class fees required. Prerequisite: Culinary Arts I & II
Development of the Young Child	04245	9-10-11-12	0.5	
Early Childhood Education	04250	10-11-12	0.5	

**Culinary Arts I**      04220                      9-10-11-12                      0.5 credit

Culinary Arts I is a course which includes the study of wellness and nutrition in one's everyday life. Units of study include food safety and sanitation, wellness and nutrition throughout the life cycle, and basic food preparation. Class Fees required. This is a prerequisite for Culinary Arts II and III.

**Culinary Arts II**      04240                      9-10-11-12                      0.5 credit                      Prereq.: Culinary Arts I

Culinary Arts II is a course which includes the study of baked goods. Units of study will include cakes, pies, cookies, bread and pastries. Class fees required. This is a prerequisite for Culinary Arts III.

**Culinary Arts III**      04260                      10-11-12                      1 credit                      Prereq.: Culinary Arts I and II

Culinary Arts III focuses on the various components of the hospitality industry concentrating in professional cooking. Students will work on the first year of the National Restaurant Association ProStart program. Projects include the TRHS School House Coffee Cart, Holiday Treat Sale, specialty meals, creative garnishes and cooking, and foods for special occasions. Students have the opportunity to participate in the ProStart competition in March. Class fees required

**Development of the Young Child**      04245                      9-10-11-12                      0.5 credit

This class explores families, parenting, prenatal development, birth, and the young child. Students in this class will 'parent' a baby simulator for one weekend during the semester. Students will learn skills for working with families and young children.

**Early Childhood Education**      04250      10-11-12      0.5 credit

This course provides experience working with children in an early childhood education setting. Students will explore intellectual, physical, emotional and social areas of development of children up to age 5. They will plan developmentally appropriate art, reading and learning activities to be used in a classroom. They will create lesson plans, lead small and large group activities, learn about children's literature, and serve as role models. This course is highly recommended for students with an interest in teaching, child care, or any job or career working with children.

# HEALTH

<i>Title of Course</i>	<i>Course #</i>	<i>Year(s) Offered</i>	<i>Credit</i>	<i>Prerequisite</i>
Health	06350	9-12	0.5	Required

**Health**                      06350                      9-12                      0.5 credit                      Required

Health is a course required by all freshmen. The overall goal of the health program is to provide students with the knowledge, skills and understanding that will enable them to complete their developmental tasks in ways that are health enhancing, both with their immediate health needs and the long term consequences of behaviors they initiate during this period.

**PLEASE NOTE: Starting with the class of 2023, Health is required for Freshman.  
Health is required of all students before Graduation.**

# HEALTH SCIENCE

<i>Title of Course</i>	<i>Course #</i>	<i>Year(s) Offered</i>	<i>Credit</i>	<i>Prerequisite</i>
Intro Health Care Occupations	04000	10-11-12	0.5	

**Intro to Health Care Occup.**                      04000                      10-11-12                      0.5 credit

Are you interested in a health related occupation as a career? Would you like to explore the growing field of health care? You can do so by exploring over 200 medical careers and match a career to your personal qualities. Major units of the course include an overview of healthcare facilities, personal health care qualities, legal responsibilities, and medical terminology. Field trips to hospitals, frequent health care professional speakers, and observations in the field of interest will be provided through this course. This course will give an opportunity to explore different careers in the health field to those students who want to continue on after high school in a health occupation.

# INTRODUCTION TO CRIMINAL JUSTICE

<i>Title of Course</i>	<i>Course #</i>	<i>Year(s) Offered</i>	<i>Credit</i>	<i>Prerequisite</i>
Intro to Criminal Justice	09005	11-12	0.5	

**Intro to Criminal Justice**      09005      11-12      0.5 credit

Students are given an overview of the entire criminal justice system in the United States from the history through the court process and punishment. Students will learn the procedures used by law enforcement and the reason behind those procedures. The class will include lecture/discussion, hands-on demonstrations, guest speakers, videos and field trips. The course is instructed by an Officer and is aimed at the student who wants to understand more about law enforcement, the laws, and the different careers and specialties in law enforcement. This course will take the mystery out of law enforcement procedures and policies, transforming student attitudes toward police and their role in society. Class size is limited and the instructor has the final say in student enrollment.

# LANGUAGE ARTS

## Overview of Required Courses:

GR	STANDARD REQUIREMENTS	Course #	ALTERNATIVE OPTIONS	Course #
9 <sup>TH</sup>	<b>English 9</b> – Full Year Course (must pass both semesters)	05100	<i>None</i>	
10 <sup>TH</sup>	<b>English 10</b> – Full Year Course (must pass both semesters)	05200	<i>None</i>	
11 <sup>TH</sup>	<b>2 Genre Classes</b> – Semester Long Courses (must have Fall and Spring semesters) <ul style="list-style-type: none"> <li>• Mythology</li> <li>• Mystery &amp; Horror</li> <li>• Fantasy &amp; Science Fiction</li> <li>• Sports Literature</li> <li>• Modern Novel</li> <li>• War &amp; Conspiracy</li> <li>• Outdoor Literature</li> </ul>	05330 05345 05350 05375 05360 05370 05380	<b>College Prep</b> (with English Teacher approval—year long course replaces <i>both</i> genre courses)  <b>Speech</b> –In <i>addition</i> to 2 req. genre courses with Teacher Approval (sem. long course)  <b>Creative Writing</b> –In <i>addition</i> to 2 req. genre courses	05400  05300  05340
12 <sup>TH</sup>	<b>Speech (AS)</b> —Semester Long Course (required per graduation requirements)  *1 additional English elective course required  Electives available include: <b>Genre elective courses</b> <b>Creative Writing</b>	05300         05340	<b>College Prep</b> —year long course (with English teacher Approval)  <b>Honors English (TC)</b> – year long course (with English teacher approval)	05400   05460

Except for the required courses – All course selections are subject to teacher recommendation

**English 9**            05100            9-Required            1 credit

Students will practice and develop critical writing, reading, speaking and listening skills. The year-long course digs into classic and contemporary literature to explore the long process of “growing up,” including units such as Coming of Age, Personal Choices, and Discovering New Realities. Students develop essential essay writing skills and critical thinking skills while engaging in discussion and collaborative learning.

**English 10**            05200            10-Required            1 credit

Students continue to develop the reading, writing, speaking and listening skills introduced in English 9. The year-long course exposes students to classic and contemporary literature to explore the topic of “Social Justice” including units such as Social Perspective, Icons of Social Movements, Protest and Social Voice. Students focus on the writing process and critical reading skills through collaboration, research and literary analysis.

**Genre Elective Courses**            0.5 Credits each            0.5 Credits each

Genre elective courses are focused on further developing the foundational skills students develop in English 9 and English 10. Students will explore possible units such as Defining the Genre, Iconic Authors and Texts, and Thematic Explorations. Students will practice researching key genre elements and responding to exemplar classic and contemporary literary works. Each genre course places a unique emphasis on analyzing organization and author craft. All genre courses will follow the same skills and template; each course, however, has its own unique literature and course focus.

**ELECTIVE COURSE OPTIONS:**

**Mythology 05330**—gods and heroes come alive in a critical study of mythological text, culture and human experience.

**Mystery & Horror 05345**—a look at how fear and suspense are built —and what these tales reflect about our own world--while focusing on classic villains and monsters.

**Fantasy & Science-Fiction 05350**—a study of how this genre comments on and critiques our world through the creation of magical or futuristic worlds.

**Sports Literature 05375**—a historical approach to analyzing classic sports figures and inspirational stories, focusing on how sport can be a reflection of life.

**Modern Novel 05360**— an exploration of a variety of perspectives on the unique issues within society today including social media, harassment, violence in schools, and relationships.

**War & Conspiracy 05370**— a study of the impact of never-ending war and our human need to create scapegoats and conspiracy theories as alternatives to truth.

**Outdoor Literature 05380**— a literary study of the outdoor experience, why we are drawn to it, and how we can all appreciate it, whether we are outdoor adventurers, environmentalists, or quiet observers.

**Speech I (AS)**      05300      12- Required      0.5 credit      Advanced Standing

Speech I will offer the student the basic fundamentals in public speaking, including: speech preparation, body movements and gestures, speech delivery, and the development of specific types, such as informative and persuasive. This is a *senior* year required course (open to juniors with English department approval). Class receives Advanced Standing from LTC.

**Creative Writing**      05340      10-11-12      0.5 credit

Creative Writing is a semester course open to sophomores (via teacher recommendation), juniors, and seniors. This is a course for those who wish to express themselves creatively and imaginatively in such literary forms as the short story, children's story, poetry and nonfiction. Techniques, insofar as they might aid the student in expressing him/herself artistically, will be studied. All will be encouraged to enter their work in contests and for publication.

**College Prep English**      05400      11-12      1 credit      Prereq.: Teacher Approval

College Prep is aligned with AP English standards, which means it is a challenging course, but it also helps prepare students who may potentially want to take the AP English tests for college credit. Designed to hone students' critical reading, writing, and thinking skills to meet the rigors of college, this course is centered around the study of literature, ranging from mythology to Shakespeare to diverse contemporary literature. Students will analyze the reading extensively and continue the analysis through discussion and writing. ***Teacher recommendation is required for enrollment.***

**Honors English (TC)**      05460      12      1 credit      Prereq.: Teacher Approval  
Transcripted Credit

Honors English is a year-long course aligned with UWGB that provides students with the opportunity to earn full college credit for two semesters of college level English. The course duplicates the content and expectations that most students will experience from English courses that are required during their first year of college. The course is open only to seniors who hold an overall grade point average of 3.4 or higher and receive the recommendation of at least one English teacher. As with typical college courses, students may be expected to purchase or rent the books for Honors English, but efforts are made to reduce this cost considerably. The first semester focuses on formal and informal essay writing. The second semester emphasizes in-depth probing and discussion, both written and oral, of literature. Students are able to earn dual credit from UW-Green Bay; there is a cost to students for these credits.

# MATHEMATICS

<i>Title of Course</i>	<i>Course #</i>	<i>Year(s) Offered</i>	<i>Credit</i>	<i>Prerequisite</i>
Algebra	05600	9	1	
Geometry	05700	10	1	Successful completion of Algebra or consent of instructor
Algebra II	05800	10-11-12	1	Successful completion of Geometry or consent of instructor
College Readiness Math	05810	11-12	0.5	Successful completion of Algebra, Geometry, and Algebra II
Math Analysis	05820	11-12	0.5	Successful completion of Algebra, Geometry, and Algebra II.
Tech Math	05830	11-12	1	Successful completion of Algebra, Geometry and consent of instructor.
Pre-Calculus	05900	11-12	1	Successful completion of Algebra II
Calculus	05950	12	1	Pre-Calculus or consent of instructor

**Algebra**                      05600                      9                      1 credit

Algebra combines letters representing numbers according to the rules of arithmetic. Algebra is a prerequisite for geometry, chemistry and physics. The course includes: adding, subtracting, multiplying and dividing of algebraic numbers, equations in one unknown (x) and two unknowns (x and y), graphing, factoring, fractions, sets and inequalities in one and two unknowns.

**Geometry**                      05700                      10                      1 credit                      Prereq.: Successful completion of Algebra or consent of instructor

Geometry presents mathematics as a deductive system—a system in which facts are developed logically. Much emphasis is placed on proving theorems. The facts proved about geometric figures provide a foundation for further study in mathematics and enable students to solve some common practical problems, such as the indirect measurement of distance and calculating areas and volumes.

**Algebra II**                      05800                      10-11-12                      1 credit                      Prereq.: Successful completion of Geometry or consent of Instructor

This course is divided into Algebra II and Trigonometry. It is a continuation of Algebra with special emphasis on quadratic equations, conic sections, sequences and series, matrices, and trigonometric functions (sine, cosine, tangent, secant, cosecant, and cotangent.)

<b>College Readiness Math</b>	05810	11-12	0.5 credit	Prereq.: Successful completion of Algebra, Geometry & Algebra II
-----------------------------------	-------	-------	------------	---

This course is designed for students to further investigate algebraic topics. Topics to be included, but not limited to, are: linear functions, quadratic functions, exponential functions, radical equations, rational equations, inverse functions and piecewise functions.

<b>Math Analysis</b>	05820	11-12	0.5 credit	Prereq.: Successful completion of Algebra, Geometry & Algebra II
----------------------	-------	-------	------------	---

This course is designed for seniors or juniors who are looking to learn about topics not covered in Algebra or Geometry. Topics to be included, but not limited to, are: conic sections, trigonometric functions, the unit circle, sequences and series and probability and statistics.

<b>Tech Math</b>	05830	11-12	1 credit	Prereq.: Successful completion of Algebra, Geometry & consent of instructor
------------------	-------	-------	----------	---

This course is designed to prepare those students who will be entering a technical school or the military. Topics to be included, but not limited to, are: fractions, decimals, percents, basic Geometry concepts, scientific notation, linear equations, proportions, quadratic equations and basic Trig functions.

<b>Pre-Calculus</b>	05900	11-12	1 credit	Prereq.: Algebra II
---------------------	-------	-------	----------	---------------------

This course covers elementary mathematical analysis, a comprehensive study of field axioms and functions, touching the subject of analytic geometry, limits, continuity and series. Other areas investigated are complex numbers, polar coordinates and exponential and logarithmic functions. Differential and integral calculus is introduced.

<b>Calculus</b>	05950	12	1 credit	Prereq.: Pre-calculus or consent of Instructor
-----------------	-------	----	----------	---

This course covers the four major concepts to be mastered in a first-semester, college-level calculus course—limit, derivative, definite integral, and indefinite integral. For each concept, the student will learn the precise definition, have an intuitive understanding of what the concept means, be able to “do” the concept, and be able to apply it in the real world or mathematical world. There are four ways this knowledge will be obtained—numerically, graphically, algebraically, and verbally. By using such multiple representations, students will learn methods for differentiating and integrating the elementary transcendental functions—trigonometric, exponential, logarithmic, and hyperbolic.

# MUSIC

<i>Title of Course</i>	<i>Course #</i>	<i>Year(s) Offered</i>	<i>Credit</i>	<i>Prerequisite</i>
Band	06010	9-10-11-12	1	Previous Band Experience
Treble Choir	06020	9-10-11-12	1	
Concert Choir	06030	9-10-11-12	1	Two Years of Treble Choir or consent of Instructor
Show Choir	06035	10-11-12	1	Enrolled in a chorus class and teacher audition
Guitar I	06040	9-10-11-12	0.5	
Guitar II	06041	9-10-11-12	0.5	Guitar I
Hand Drumming	06045	9-10-11-12	0.5	Consent of Instructor
Advanced Musicianship	06050	9-10-11-12	0.5	Consent of Instructor
Class Piano I	06064	9-10-11-12	0.5	
Class Piano II	06066	9-10-11-12	0.5	Piano I or consent of instructor
Class Piano III	06068	9-10-11-12	0.5	Piano II or consent of instructor

**Individualized instruction will be available in most areas of music for those whose needs may not be met by the courses listed above. Please consult the instructor.**

**Band**                      06010                      9-10-11-12                      1 credit                      Prereq.: Previous Band experience

Band is a two-semester course for students in grades 9-12. A student may enroll in this class as many as four times. Band instruction provides the opportunity for students to develop their individual level of musicianship, experience performance situations, and gain a sound education in the art of musical expression through the areas of melody, rhythm, harmony, timbre, texture and form. Rehearsals demand student maturity and cooperation. Lessons and/or sectionals, scheduled during the school day, are a requirement of this course. Participation in concert activities is also required: in school pep assemblies, parades during the school year, pep band performances at home conference football and basketball games, marching field shows, Holiday Concert, Winter Band Concert, Spring Concert, solo ensemble festival, and field trips during the school year. (Freshmen are required to also sign up for Music Literacy for one semester.)

**Treble Choir**            06020            9-10-11-12            1 credit

This class is designed primarily for freshman and sophomore women. Music studied and performed includes easy to intermediate music in 3 to 4 parts in all styles, periods and genres. Vocal techniques and musicianship skills will be studied. Rehearsals demand student maturity and cooperation. Lessons scheduled during the day are a requirement. Participation in concert activities is required.

**Concert Choir**            06030            9-10-11-12            1 credit            Prereq.: Women: 2 years of Treble Choir or consent of Instructor

This choir is made up of 9<sup>th</sup>-12<sup>th</sup> grade men and 11<sup>th</sup> and 12<sup>th</sup> grade women (9<sup>th</sup>-10<sup>th</sup> require consent of instructor). Music studied and performed includes complex 3 and 4 part songs in all styles, periods and genres. Concepts of advanced vocal techniques, music fundamentals, music appreciation and musicianship will be studied. Rehearsals will demand considerable student maturity and cooperation. Lessons scheduled during the day are a major requirement of the course. Participation in concert activities is required. It is recommended that students have prior choral experience of at least two years. Early acceptance into this choir will be determined by auditions or consent of the instructor.

**Show Choir**            06035            10-11-12            1 credit            Prereq.: Enrolled in a chorus class and teacher audition

Show Choir is an audition only group for students interested in performing in a singing and dancing ensemble. Students will study and learn various genres of music including pop, jazz, show tunes, and more. This is a year long commitment. Students will be required to attend a small amount of extra rehearsals outside of the school day, as well as several performances outside the school day. Students are required to take a regular ensemble choir (Treble Choir, Concert Choir) in order to be eligible to take Show Choir. Previous dance experience is not required.

**Guitar I**            06040            9-10-11-12            0.5 credit

Guitar class is offered to all high school students. Enrollment may be limited due to the number of school-owned guitars available; however, students can use their own guitar if they have one. The class is designed to teach students how to play guitar, including reading melodies, rhythms and chords as well as transcribing music off of recordings.

**Guitar II**            06041            9-10-11-12            0.5 credit            Prereq.: Guitar I

Guitar II class is designed for the intermediate guitar student who has mastered the skills required in Guitar. Enrollment may be limited due to the number of school-owned guitars available; however, students can use their own guitar if they have one. The class is designed to further enhance students to play guitar, including melodies, rhythms, and chords as well as transcribing music off of recordings.

**Hand Drumming Ensemble**            06045            9-10-11-12            0.5 credit            Prereq.: Consent of instructor

Open to all students, Grades 9-12 currently enrolled in band. Students not currently in the band program can audition to be a member of the ensemble. Membership to the group may be limited based upon the number of instruments available. Students will learn to play multi-cultural music made up of mostly percussion instruments. The ensemble will perform at concerts and festivals.

**Advanced Musicianship**      06050      9-10-11-12      0.5 credit      Prereq.: Consent of instructor

This course is for students who want to improve their musicianship and musical abilities. Students will design a project or area of study upon which they will work. Areas include jazz improvisation, composition, arranging, festival music, etc. (See the instructor for permission to enroll in this course.)

**Class Piano I**      06064      9-10-11-12      0.5 credit      Prereq.: Piano I or Consent of instructor

This course is designed for the beginning piano student. Content includes learning to read simple rhythms, read treble and bass clef notes, interpret the most commonly used dynamic symbols, play with both hands simultaneously, and use the most common chords to harmonize melodies. Styles of music will vary. ***Students do not have to know how to play the piano to take this course.***

**Class Piano II**      06066      9-10-11-12      0.5 credit      Prereq.: Piano II or Consent of instructor

This course is designed for the intermediate piano student who has already mastered the skills required in Class Piano I. Alternating private lessons will be scheduled during the class. Students will learn to play more complicated two-hand music and will expand their knowledge of music theory. Styles of music will vary.

**Class Piano III**      06068      9-10-11-12      0.5 credit

This class is designed for the student who has mastered the skills of Class Piano I and II. The focus of this class will be on developing the coordination of two-hand playing along with the use of the pedals. More advanced theory will be studied. ***Note: You may take this class even if you have not taken Class Piano I and II, provided you already possess the required skills. Check with the instructor.***

# PHYSICAL EDUCATION

<i>Title of Course</i>	<i>Course #</i>	<i>Year(s) Offered</i>	<i>Credit</i>	<i>Prerequisite/Fees</i>
Intro to Health & Fitness	06100	9-10	0.5	Required in 9 <sup>th</sup> or 10 <sup>th</sup> gr.
Competitive Team Sports	06200	10-11-12	0.5	Intro to Health & Fitness
Team Sports	06210	10-11-12	0.5	Intro to Health & Fitness
Recreational Sports	06220	10-11-12	0.5	Intro to Health & Fitness <b>Fee required</b>
Personal Fitness	06230	10-11-12	0.5	Intro to Health & Fitness
Year Advanced Weight Training	06305	10-11-12	1	Intro to Health & Fitness
Semester Advanced Weight Training	06310	10-11-12	0.5	Intro to Health & Fitness
Lifeguarding	06400	10-11-12	0.5	Fee Required

**Note:** All students are required to take “Intro to Health & Fitness” in their freshman or sophomore year.

**Intro to Health & Fitness**    06100            9-10            0.5 credit            Required

Intro to Health & Fitness is a ninth or tenth grade semester course designed to introduce students to a wide variety of Physical Education activities. Students will work on skill development and learn associated rules and strategies while participating in cooperative games, football/soccer, volleyball/basketball, and swimming units. Students will also learn important health and fitness concepts through the completion of a fitness unit in which they will establish personalized health and fitness goals, and work to accomplish those goals while performing a series of running, walking, and weight training workouts.

**Competitive Team Sports**            06200            10-11-12            0.5 credit            Prereq.: Intro to Health & Fitness

“Competitive Team Sports” is a semester course designed for athletic, competitive students. A greater emphasis will be placed on the competitive aspects of team sports. Students will participate in badminton, basketball, football/soccer, volleyball units. Students choosing to enroll in “Competitive Team Sports” should enjoy competition, have a basic knowledge of these sports, and are confident they can execute the skills and strategies associated with the majority of these activities.

**Team Sports**            06210            10-11-12            0.5 credit            Prereq.: Intro to Health & Fitness

“Team Sports” is a semester course designed primarily for non-athletic students. A greater emphasis will be placed on learning the basic knowledge and fundamentals of the sport. Students will participate in badminton, basketball, football/soccer, softball, tennis, and volleyball unit. Students choosing to enroll in “Team Sports” will be exposed to competitive situations, but less emphasis will be placed on the competition aspect.

**Recreational Sports**            06220            10-11-12            0.5 credit            Prereq.: Intro to Health & Fitness  
Fee required

“Recreational Sports” is a semester course designed for students interested in individual sport and fitness activities. Students will learn basic rules and develop skills while participating in a variety of activities such as archery, badminton, bowling, golf, horseshoes, disk golf, orienteering, swimming and tennis. **This course requires a \$20.00 fee due a week prior to the start of the bowling unit. Students who fail to pay the fee will receive “0 Points” for the bowling unit.** For more information on this course, please contact Mr. Jansky.

**Personal Fitness**            06230            10-11-12            0.5 credit            Prereq: Intro to Health & Fitness

“Personal Fitness” is a semester course designed for students who are serious about improving their overall health and fitness levels. The “Personal Fitness” course will focus on improving the student’s muscular strength, cardiovascular endurance, resting heart rates, and nutritional habits. Students will spend 8-10 days in the classroom learning basic health and fitness concepts, and complete a series of basic fitness tests to determine their current fitness levels. Based on their fitness testing results, students will establish health and fitness goals and perform a variety of daily workouts as they strive to improve their current health and fitness levels. For more information on this course, please contact Mr. Jansky.

**Year Advanced Weight Training**            06305            10-11-12            1 credit            Prereq.: Intro to Health & Fitness

“Advanced Weight Training” is a Yearlong course that is designed for students who are serious about weight training and fitness. All students will participate in the Bigger Faster Stronger weightlifting program, which allows every athlete, regardless of sport or gender, to make great mental and physical gains. For more information on this course, please contact Mr. LaTour.

**Sem. Advanced Weight Training**            06310            10-11-12            0.5 credit            Prereq.: Intro to Health & Fitness

“Advanced Weight Training” is a semester course which can be taken for one or both semesters, it is designed for students who are serious about weight training and fitness. All students will participate in the Bigger Faster Stronger weightlifting program, which allows every athlete, regardless of sport or gender, to make great mental and physical gains. For more information on this course, please contact Mr. LaTour.

**Lifeguarding**      06400      10-11-12      0.5 credit      Prereq.: Fee Required

“Lifeguarding” is a semester course offered with a certified YMCA/American Red Cross Instructor to provide students the opportunity to become certified lifeguards. Students will complete 32 hours of coursework that will include classroom and pool activities. **This class is limited to 10 students and students are required to pay a \$38.00 Fee.** The “Lifeguarding” class will be held in combination with a Competitive Team or Team Sports class, so when students are not completing “Lifeguarding” class coursework, they will attend a Competitive Team or Team Sports class.

# SCIENCE

<i>Title of Course</i>	<i>Course #</i>	<i>Year(s) Offered</i>	<i>Credit</i>	<i>Prerequisite</i>
Science 9	07100	9	1	Required
Biology	07200	10	1	Required
General Chemistry	07300	10-11-12	1	Successful completion of entire Algebra and Biology courses
Advanced Biology (TC)	07306	11-12	1	A "B" or better in Biology Transcripted Credit
Human Genetics	07310	11-12	0.5	Biology
Human Anatomy & Physiology (AS)	07320	11-12	0.5	Biology
Pathology	07330	11-12	0.5	Biology
Ecological Science	07350	11-12	1	Biology
Marine Ecology	07355	9-10-11-12	0.5	Summer Class & Fee Required
Physics (TC)	07400	11-12	1	Successful completion of entire Algebra and Biology courses, Transcripted Credit
Advanced Chemistry	07450	11-12	1	Successful completion of entire General Chemistry

**Science 9**            07100                    9                    1 credit                    Required

Science 9 offers up an interactive approach to science that pushes kids to explore and experiment in order to fully understand and appreciate physical science concepts. Through a variety of hands-on lab activities, students will learn to explain what they observe and apply it to concepts outside of a classroom. Students will often be asked to design their own labs or conduct engaging experiments in order to make scientific principles engaging and applicable to real world scenarios.

**Biology**            07200                    10                    1 credit                    Required

Biology, or the "Science of Life", is centered around the major biological concepts with emphasis on hands-on laboratory experience that emphasize problem solving and the role of man in his external and internal environment. A considerable amount of laboratory work helps give meaning to the many principles, concepts, facts and theories that are studied, as well as preparing the person for future studies in science or lifetime learning skills.

<b>General Chemistry</b>	07300	10-11-12	1 credit	Prereq.: Successful completion of entire Algebra & Biology courses.
--------------------------	-------	----------	----------	---

A hidden world made up of atoms, ions, and molecules will be explored in this college-preparatory course. Students will qualitatively and quantitatively investigate matter, its interaction with other matter, and the resulting changes they undergo. Learning is enhanced with frequent, exciting laboratories where the evidence of these changes is made apparent via heat, light, and/or sound to name a few. Application to real-life phenomena and industrial processes is weaved into the curriculum throughout the year.

<b>Advanced Biology (TC)</b>	07306	11-12	1 credit	Prereq.: A "B" or better in Biology. Transcribed Credit
------------------------------	-------	-------	----------	---

This course is the equivalent of a freshman level college Biology class. A sound foundation in science, particularly Biology, will be crucial for student success. Lab work will be a primary component of this course. Successful completion of this course will prepare students to take the Advanced Placement Biology exam (optional) which is accepted by most universities and colleges as either credit or fulfilling a freshman level biology requirement. This course can be taken for credit from UW-Oshkosh (Bio105) for cost.

<b>Human Genetics</b>	07310	11-12	0.5 credit	Prereq.: Biology
-----------------------	-------	-------	------------	------------------

This is the study of human heredity and Mendelian genetics. The student will gain a better understanding of why "you are you" both physically and chemically. Human genetics is lab oriented and involves extraction, separation of DNA fragments by electrophoresis, and statistical analysis of genetic traits in populations. The recent advances in genetic engineering are covered as well as the ethical and legal problems they create.

<b>Human Anatomy &amp; Physiology (AS)</b>	07320	11-12	0.5 credit	Prereq.: Biology
--	-------	-------	------------	------------------

This class is a study of the human body on a system by system basis. The major organs and their functions are emphasized. Various laboratory activities include observation of one's own body functions.

<b>Pathology</b>	07330	11-12	0.5 credit	Prereq.: Biology
------------------	-------	-------	------------	------------------

Pathology is the study of diseases. This course will survey many of the important diseases and their bacterial, viral, parasitic, genetic, and environmental causes. Laboratory Activities reinforce central concepts and microbiological techniques.

<b>Ecological Science</b>	07350	11-12	1 credit	Prereq.: Biology
---------------------------	-------	-------	----------	------------------

Ecological Science is the study of interactions between living and nonliving things. The interdependence of living things and their environment will be explored through hands-on activities. Students will gain a deep understanding of human impacts on our natural world and learn to become wise stewards of our environment.

<b>Marine Ecology (Summer)</b>	07355	9-10-11-12	0.5 credit	Fee required
--------------------------------	-------	------------	------------	--------------

Marine Ecology class consists of two parts: a week of class at TRHS and 6 days at Marine Lab in Key Largo, Florida. Topics include: general ecology, water quality, animal phyla, marine habitats, fish families, and environmental threats. Field Trips may include: Everglades, Sea grasses, Mangroves, and Coral Reefs. Many hands-on activities help to reinforce concepts. Students will learn and then apply the material while experiencing the ecology of southern Florida. Fee required for Florida excursion.

<b>Physics (TC)</b>	07400	11-12	1 credit	Prereq.: Successful completion of entire Algebra & Biology courses Transcripted Credit
---------------------	-------	-------	----------	---

Physics is a laboratory-based science course for students planning on entering college or a technical career. Students will learn to describe the natural world using the language of mathematics in order to understand the physical laws governing the universe. Computer measurement hardware and analysis software is used to explore topics in motion, force, and energy. This course is a CAPP (Cooperative Academic Partnership) class, in which a student may earn 5 college credits through UW-Oshkosh, upon successful completion of the year-long course and payment of the greatly-reduced tuition fee of \$500.00.

<b>Advanced Chemistry</b>	07450	11-12	1 credit	Prereq.: Successful completion of Chemistry
---------------------------	-------	-------	----------	---

This course offers a study of Chemistry at the collegiate level. Among others, concepts of thermodynamics, kinetics, equilibrium, Lewis structures, electrochemistry, and organic chemistry will be explored via discussion, frequent laboratory work, and technological instrumentation. Though this course is not officially an “advanced placement” class, allowing content and time flexibility, the curriculum and its rigor will sufficiently prepare a student to take the AP exam in May (optional).

# SOCIAL SCIENCE

Title of Course	Course #	Year(s) Offered	Credit	Prerequisite
U.S. History I	08100	9	1	Required
U.S. History II	08225	10	1	U.S. History I
European History	08230	10	1	U.S. History I with a "C" or better
World Geography	08150	9-10-11-12	0.5	
American Government	08300	11	0.5	Required
Today's Topics	08310	11-12	0.5	
Sociology (AS)	08320	11-12	0.5	* Advanced Standing
Introduction to Psychology (TC)	08330	11-12	1	Class is a Dual Credit class
Developmental Psychology (TC)	08340	11-12	0.5	Prereq: Must have taken or currently taking Intro. to Psych. Class is a Dual Credit class
Financial Literacy	08400	12	0.5	Required

\***Sociology** can be an advanced standing credit through Lakeshore Technical College.

**U.S. History I**      08100                      9                                      1 credit                      Required

This course covers United States history from our country's formation through the end of the World War II era. Throughout this course students will explore and examine the important developments, events, and eras of American history from 1776-1945. The political, social and economic aspects of this time period will be thoroughly investigated. We will continually analyze how these developments and events affect our present and future.

**U.S. History II**      08225                      10                                      1 credit                      Prereq.: U.S. History I

This course covers United States history from 1945 through the present. Students will explore and examine important developments, events, and eras including Post-WWII America, the Cold War, the Civil Rights Movement, the Vietnam War era, America at the end of the 20th Century, America's response to Terrorism, and America today. The political, social, and economic aspects of each era will be thoroughly investigated. We will continually analyze how these events affect both the present and the future of our nation.

<b>European History</b>	08230	10	1 credit	Prereq.: U.S. History I with a "C" or better
-------------------------	-------	----	----------	--

This course is designed for students who wish to gain a better understanding of how Europe has evolved since 1450. It emphasizes student understanding of important cultural, economic, political and social developments that affected not only Europe but shaped the world we live in today. Students will develop an understanding of the principle themes in modern European history, an ability to analyze historical evidence, engage in historical interpretation, and express historical understanding in writing. A variety of teaching methods and strategies will be used to assist students in learning the necessary content and skills to prepare to take the AP European History test (optional).

<b>World Geography</b>	08150	9-10-11-12	0.5 credit	
------------------------	-------	------------	------------	--

This course is designed to provide students with knowledge about the physical and human geography of our world. It is designed to enhance their understanding of the world's regions and cultures as to how they interrelate, and to provide beneficial instruction and practice to students in developing their basic map skills, critical thinking skills, writing skills and other general social science skills.

<b>American Government</b>	08300	11	0.5 credit	Required
----------------------------	-------	----	------------	----------

This course is designed to provide students with the knowledge and skills necessary for good citizenship. Students will learn about the functions of local, state and national governments. An in-depth look at political parties and voting will also be included.

<b>Today's Topics</b>	08310	11-12	0.5 credit	
-----------------------	-------	-------	------------	--

Today's Topics is a course that deals with local, national, and the world's daily events. Students will read a current events magazine and incorporate what they learned into the classroom discussion. The topics discussed will be supplemented by the use of the internet and news programs. Students that have an interest in the news and happenings around the world would enjoy the class. Student discussion and debate of current topics is encouraged and required.

<b>Sociology (AS)</b>	08320	11-12	0.5 credit	Required Class of 2021
-----------------------	-------	-------	------------	------------------------

Sociology introduces students to the basic concepts of sociology: culture, socialization, social stratification, multiculturalism, and the five institutions, including family, government, economics, religion, and education. Other topics include demography, deviance, technology, environment, social issues, social change, social organization, and workplace issues.

**Introduction to Psychology (TC)**      08330      11-12      1 credit      Transcribed Credit

Introduction to Psychology introduces students to a survey of the multiple aspects of human behavior. It involves a survey of the theoretical foundations of human functioning in such areas as motivation, emotions, memory, sensation and perception, physiological factors, social influences, learning, personality development, deviance and pathology, mental health, therapy, altered states of consciousness (including sleep and dreams, psychological testing, and development. It directs the student to an insightful understanding of the complexities of human relationships in personal, social, and vocational settings.

**Developmental Psychology (TC)**      08340      11-12      0.5 credit      Transcribed Credit

Developmental Psychology introduces the student to the study of human development throughout the lifespan. This course aims to explain growth, change, and consistency through the lifespan from conception to death. Developmental Psychology looks at how thinking, feeling, and behavior changes throughout a person's life. This course explores developmental theory and research with an emphasis on the interactive nature of the biological, cognitive, and psychosocial changes that affect the individual from conception to death. A large amount of the focus is on childhood, as this is the period during an individual's lifespan when the most change occurs. Application activities and critical thinking skills will enable students to gain increased knowledge and understanding of themselves and others. (Must have taken or currently taking Introduction to Psychology)

**Financial Literacy**      08400      12      0.5 credit      Required

Consumer Economics is a course required of all seniors. The first half is on economic systems, businesses, labor-management relations. The second half is a study on being a wise consumer; shop sales, different types of stores, grocery shopping, characteristics of contract, apartment lease, writing a letter of complaint, legal assistance, advertisement, credit and banking.

**\*\* Subscribe to TRHS Technology Education on YouTube\*\***

## Technology Education notes:

All courses require that students pay a shop fee to help defray the cost of general materials. The shop fee will vary with each course taken.

- Most courses require that students bring in or purchase individual project materials. Material costs will vary according to the project(s) determined.
- Most courses require that students bring in or purchase safety equipment.

## Construction

**Home Maintenance**            08520        9-10-11-12        0.5 credit

This very basic course is for any student who would like to save money by being able to perform home repairs on their own in the future. This course will help students with common household repairs in the areas of wall framing, wall sheathing installation, vinyl siding installation, copper and PVC (*plastic*) pipe plumbing, wiring common electrical circuits, interior drywall construction/texturing/repair, ceramic tile installation & finishing, wall painting, wallpapering, roof component installation, and much, much more. FYI, during parent/teacher conferences, many parents have informed me that they wished that they had a class like this available to them when they were in high school.

**Construction  
(Residential)**                    08620        10-11-12        1 credit

This somewhat basic course will provide students with knowledge and hands-on experiences related to house framing/construction, brick and concrete block masonry, land surveying, residential plumbing, residential electrical and residential building codes/regulations. In addition, students will learn about machine and power tool operations that are common to the industry. A major emphasis will be placed on safety, as it relates to each area. By taking this course, students will develop skills to improve their chances of obtaining a job/career in the residential construction industry and/or will better prepare themselves for post-secondary educational opportunities related to the field. **Starting with the 2020-21 school year, taking this course could provide you with Carpentry Certification.**

**Note:** Students who take this course might be required to take 1-2 days off of school to work on projects that take place off of the school's campus. However, students will never be required to take off of school if the grades in any of their other classes are in jeopardy. Starting with

## Manufacturing

**Woods I**                    08530            9-10-11-12        1 credit

This very basic course will provide students with technical woodworking information related to project planning, layout, cutting, assembly, finishing, and shop safety. Students will work independently, on constructing their own woodworking project, upon the instructor's approval. No prior woodworking experience is necessary. Students will be required to work with hand and power tools, so as to obtain an overall exposure to the woodworking industry. Occupational opportunities in the woodworking industry and residential construction trades, along with work and training requirements will be discussed. In addition, an introduction to the field of residential construction will be covered through the construction of a scale model house. *Common projects include: nightstands, CD/DVD cabinets, end tables, small entertainment centers, a scale model house, etc.*

**Woods II**                    08630            10-11-12        1 credit            Prereq.: A "C" or better in Woods I

This advanced course will provide students with a review of technical information covered in Woods I. Students will study design principles and apply them to an individual, major project that is primarily of their choice. In addition to constructing a major project, coursework will include wood bending, plastic laminating, pattern making, machine maintenance, and tool sharpening. *Common projects include: gun cases, coffee tables, bars, end tables, curios, corner hutches, dining room tables, china cabinets, chests, entertainment centers, etc.*

**Metals I (TC)**      08540                      9-10-11-12                      1 credit                      Transcribed Credit

This very basic course will provide students with an introduction to many modern metal manufacturing processes which include but are not limited to: SMAW(Stick) welding, GMAW (MIG) welding, soldering & brazing, GTAW (TIG) welding, foundry & casting, sheet metal working, accompanied by a wide variety of cutting and drilling operations. Students enrolled in this course will fabricate a variety of class projects throughout the course. Upon completion of the class, students will be competent in basic metalworking and may earn dual credits for LTC by completing the course in good standing.

**Metals II (TC)**      08615                      10-11-12                      1 credit                      Prereq.: A "C" or better in Metals I & instructor's consent. Transcribed Credit

This advanced course will provide students with a deeper understanding of topics covered in Metals 1 along with an in-depth understanding of a variety of milling operations, lathe facing, turning, and boring, precision grinding, threading, and CNC operation. Students will also study the manufacturing and design principles necessary to effectively plan and safely manufacture their own individual projects. Students may earn articulated credits for LTC by completing this course in good standing.

## **Power and Energy**

**Small Engine Technology**                      08550                      9-10-11-12                      1 credit

This very basic course will provide students with a basic understanding of mechanical repair and maintenance applications. Topics to be covered include four-stroke and two-stroke engine theory, operation, repair, and maintenance. Students will explore fuel, governor, ignition, transaxle, starting, and cooling systems. Students will have the opportunity to disassemble and recondition two and/or four stroke engines. Upon completion of this course, students will understand small engine maintenance and repair. This course is a prerequisite and will prepare students for Automotive & Transportation Technology.

**Automobile Technology I (Car Care)**                      08710                      10-11-12                      0.5 credit                      Note: cannot take if enrolled in or have taken Auto. Tech. II

This very basic course formerly called Care Care will inform students about common automotive maintenance techniques. Students will be able to identify basic car parts, complete routine automotive maintenance, and diagnose basic automotive problems. The purpose of this course is to help students know what to look for when purchasing a vehicle, purchasing vehicle insurance, and preventing them from being overcharged by a repair shop. Students are welcome to bring in vehicles or equipment for lab projects throughout the course.

*NOTE: Students who do not drive to school or have access to vehicles may complete lab activities on school owned vehicles.*

<b>Formula Racing (AS)</b>	08715	10-11-12	1 credit	Prereq.: A "C" or better in Metals I or Automobile Tech. II Advanced Standing
----------------------------	-------	----------	----------	--

This advanced course allows high school students to earn both high school and college credit while having fun. Students will be given the opportunity to design manufacture a formula style racing go kart and compete against other schools statewide at Road America Speedway in Elkhart Lake. This course will require skills in the areas of manufacturing, drafting, welding, and machining. It will also provide students with experience in budgeting, presenting to groups, teamwork, problem solving and communication. In addition, students may earn articulated credits through Lakeshore Technical College. *(Note: this course may be taken more than once for high school and technical college credit).*

**Other**

<b>Raider Manufacturing</b>	08750	10-11-12	0.5 credit	Prereq.:1 credit of Technology Education
-----------------------------	-------	----------	------------	--

Students enrolled in Raider Manufacturing can expect to effectively make, market, and sell goods and services by using cutting edge technologies such as computer aided drafting with laser engravers, 3d printers, vinyl cutters, cnc routers along with traditional wood and metal manufacturing machines to create, plan, organize, staff, market, and distribute a variety of products and materials through a manufacturing enterprise. This real life course will expose students to how supply chain management, manufacturing, marketing, and distribution are integrated together in today's modern business world.

<b>Independent Study</b>	08730	11-12	0.5-1 credit	Prereq.: A "B" or better in any advanced Tech Education Course and instructor approval
--------------------------	-------	-------	--------------	--

Independent Study in Technology is an opportunity for advanced students to apply principles, processes, and skills learned to the completion of a project that reflects their advanced standing. Students will select an area of interest and develop knowledge in their area of interest.

# WORLD LANGUAGES

<i>Title of Course</i>	<i>Course #</i>	<i>Year(s) Offered</i>	<i>Credit</i>	<i>Prerequisite</i>
Spanish I	08901	9-10-11-12	1	Grade of "C" or better in Grade 8 English
Spanish II	08902	9-10-11-12	1	Grade of "C" or better in Spanish I
Spanish III	08903	10-11-12	1	Grade of "B" or better in Spanish II
Spanish IIII	08904	11-12	1	Grade of "B" or better in Spanish III or consent of instructor
Spanish V	08905	12	1	Grade of "B" or better in Spanish IIII or consent of instructor

***Students who have demonstrated satisfactory performance in seventh and eighth grade Spanish at L.B. Clarke, has the option of taking Spanish 2 based upon the recommendation of the World Language Department.***

**Spanish I**      08901      9-10-11-12      1 credit      Prereq.: A "C" or better in Grade 8 English

This introductory course is communicative and designed for students with little or no previous study of Spanish. Students will begin to develop their Spanish proficiency through extensive interaction in the target language to acquire basic language patterns and vocabulary. Emphasis will be on the acquisition of the four language skills: listening, speaking, reading and writing through repetition and comprehensible input. Students will be assessed in all four language skills using both formative and summative assessments. Culture is an integral part of the course and is introduced through the use of media, adapted readings and class discussions. Students will also explore the use of a second language in the workplace. Active participation is required.

**Spanish II**      08902      9-10-11-12      1 credit      Prereq.: A "C" or better in Spanish I

Spanish II is a continuation of the skills acquired in Spanish I. There is a greater concentration on using the spoken language. Spanish II is also performance-based and students are required to demonstrate all four skills. Emphasis on the use of a second language in the workplace is continued.

**Spanish III**      08903      10-11-12      1 credit      Prereq.: A "B" or better in Spanish II

Spanish 3 is an advanced class with emphasis on grammar, extemporaneous speech, composition writing/literature and culture. Students are expected to demonstrate all four communication skills. Emphasis on the use of a second language in the workplace is continued.

<b>Spanish III</b>	08904	11-12	1 credit	Prereq.: A “B” or better in Spanish III or instructor’s consent
--------------------	-------	-------	----------	---

Spanish III is a course for students of above-average ability who have had three years of Spanish on the high school level. Class work is conducted in Spanish for the most part. Students are expected to demonstrate all four communication skills. Special emphasis is placed on preparing for college placement exams. The curriculum for this year can include the study of Mexico, Latin America, or Spain in preparation for a home stay with a family in Spanish-speaking country. Emphasis on the use of a second language in the workplace is continued.

<b>Spanish V</b>	08905	12	1 credit	Prereq.: A “B” or better in Spanish III or instructor’s consent
------------------	-------	----	----------	---

Spanish V is a continuation of the advanced level for students of above average ability. Class work is conducted in Spanish. Special emphasis is placed on preparing for college placement exams. The curriculum for this year can include the study of Mexico, Latin America, or Spain in preparation for a home stay with a family in a Spanish-speaking country. Continued demonstration of all four communication skills is expected. Emphasis on the use of a second language in the workplace is continued.

# WORK EXPERIENCE

**Tech Prep**    09003            11-12            Credits vary            Available to juniors with counselor approval

Students gain work experience through employment/volunteering in the community, or the school district. Student's grades are based on quarterly reflections along with the supervisor evaluation. See your Counselor for additional details.

**Youth Apprenticeship**            YA            11-12            3 Credits

Youth apprenticeships are available in various areas. Students are chosen through an application and interview process. The program includes related instruction which may or may not be at TRHS, employment at a mentored work site, and graduation required course work at TRHS. Applications are generally available in December/January and the deadline is February. An information night is held in February. See the Youth Apprenticeship Coordinator or your School Counselor for additional details.

# POST SECONDARY OPTIONS

**Early College Credit Program**    ECCP    9-10-11-12            Credits vary

The Early College Credit Program gives students an opportunity to take a class at a UW college if they are interested in a class that is not offered at TRHS. Students must apply by Oct 1 for second semester classes and March 1 for first semester classes of the following year. Students will be awarded high school and college credit for the completed class.

**Start College Now**            SCN            11-12            Credits vary

Start College Now gives students an opportunity to take a class at a technical college if they are interested in a class that is not offered at TRHS. Students must apply by Oct 1 for second semester classes and March 1 for first semester classes of the following year. Students will be awarded high school and college credit for the completed class.

# ONE OPPORTUNITY. LIMITLESS POSSIBILITIES.

If you want to play sports at an NCAA Division I or II school, start by registering for a Certification Account with the NCAA Eligibility Center at [eligibilitycenter.org](http://eligibilitycenter.org). If you want to play Division III sports or you aren't sure where you want to compete, start by creating a Profile Page at [eligibilitycenter.org](http://eligibilitycenter.org).

## ACADEMIC REQUIREMENTS

To play sports at a Division I or II school, you must graduate from high school, complete 16 NCAA-approved core courses, earn a minimum GPA and earn an ACT or SAT score that matches your core-course GPA.

## CORE COURSES

Only courses that appear on your high school's list of NCAA core courses will count toward the 16 core-course requirement; visit [eligibilitycenter.org/courselist](http://eligibilitycenter.org/courselist) for a full list of your high school's approved core courses. Complete 16 core courses in the following areas:

### DIVISION I

Complete 10 NCAA core courses, including seven in English, math or natural/physical science, before your seventh semester.

### DIVISION II

## GRADE-POINT AVERAGE

The NCAA Eligibility Center calculates your grade-point average based only on the grades you earn in NCAA-approved core courses.

- DI requires a minimum 2.3 GPA.
- DII requires a minimum 2.2 GPA.

## SLIDING SCALE

Divisions I and II use sliding scales to match test scores and GPAs to determine eligibility. The sliding scale balances your test score with your GPA. If you have a low test score, you need a higher GPA to be eligible. Find more information about test scores at [ncaa.org/test-scores](http://ncaa.org/test-scores).

## TEST SCORES

You may take the SAT or ACT an unlimited number of times before you enroll full time in college. Every time you register for the SAT or ACT, use the NCAA Eligibility Center code 9999 to send your scores directly to us from the testing agency. We accept official scores only from the ACT or SAT, and won't use scores shown on your high school transcript. If you take either test more than once, the best subscore from different tests are used to give you the best possible score.

# HIGH SCHOOL TIMELINE

## 9<sup>TH</sup> GRADE

• *Start planning now!* Take the right courses and earn the best grades possible.

- Find your high school's list of NCAA-approved core courses at [eligibilitycenter.org/courselist](http://eligibilitycenter.org/courselist).
- Sign up for a free Profile Page at [eligibilitycenter.org](http://eligibilitycenter.org) for information on NCAA requirements.

## 10<sup>TH</sup> GRADE

REGISTER

• If you fall behind academically, ask your counselor for help finding approved courses you can take.

- Register for a Profile Page or Certification Account with the NCAA Eligibility Center at [eligibilitycenter.org](http://eligibilitycenter.org).
- Monitor your Eligibility Center account for next steps.
- At the end of the year, ask your counselor at each high school or program you attended to upload your official transcript to your NCAA Eligibility Center account.

## 11<sup>TH</sup> GRADE

• Check with your counselor to make sure you are on track to complete the required number of NCAA-approved courses and graduate on time with your class.

- Take the ACT or SAT and submit your scores to the NCAA Eligibility Center using code 9999.
- Ensure your sports participation information is correct in your Eligibility Center account.
- At the end of the year, ask your counselor at each high school or program you attended to upload your official transcript to your NCAA Eligibility Center account.

## 12<sup>TH</sup> GRADE

• Complete your final NCAA-approved core courses as you prepare for graduation.

- Take the ACT or SAT again, if necessary, and submit your scores to the NCAA Eligibility Center using code 9999.
- Request your final amateurism certification beginning April 1 (fall enrollees) or Oct. 1 (winter/spring enrollees) in your NCAA Eligibility Center account at [eligibilitycenter.org](http://eligibilitycenter.org).
- After you graduate, ask your counselor to upload your final official transcript with proof of graduation to your NCAA Eligibility Center account.
- *Reminder:* Only students on an NCAA Division I or II school's institutional request list will receive a certification.

How to plan your high school courses to meet the 16 core-course requirement:

$$4 \times 4 = 16$$
