

## Goal Assignment - Learning about you.

What are your life goals? What do you plan on doing immediately after high school? What career?

What interests do you have in science? Which subjects do you find the most interesting?

What are your goals related to this class? What will you get out of this class?

What do you need to do to achieve your goals listed above?

How can I help you achieve goals? Is there anything I should know about you to make this class an environment you can learn in?

What are your attributes? (What are you good at?)

What things are hard for you to do both school related and outside of school?
