## Guiding Principles:

1. All children are capable and competent.
2. A child's early learning and development is multidimensional.
3. Expectations for children must be guided by knowledge of child growth and development.
4. Children are individuals who develop at various rates.
5. Children exhibit a range of skills and competencies within any area of development.
6. Children learn through play and the active exploration of their environment.
7. Parents are children's primary and most important caregivers and educators.

These are selected 4-K skills guided from the Wisconsin Model Early Learning Standards. Because children develop at different rates, these skills may or may not be met after completion of a 4-K program.
