

## **ELEMENTARY ART NEWS**

Students in grades one through four will build and refine skills in art through study of the elements of art and principles of design.

Elementary artists will work with several mediums, including crayon, oil pastel, charcoal, colored pencil, watercolor, tempera paint, clay, sculpture, and paper mache.

Students will learn about famous artists, and will study the art of other cultures.

Elementary artists will learn how to critique their work, and the work of others. Students will use a rubric as a guide to learn about effort, neatness, and creativity.

All projects will be related to literature, math, or science.
